- ReactJs	- NextJs	- TailwindCSS
- Git Version Control	- Redux Management	- Figma
- Photoshop	- Indesign	- Learning System Management(LMS)

Projects

Betting App
Demonstrating my routing and authentication skills through an interactive ReactJS-based Betting App. With design inspiration from a comprehensive figma project, this project shows my proficiency in building dynamic user interfaces and ensuring seamless mobile responsiveness across various devices using Styled Components.

Crypto App
Dummy Decentralized Cryptocurrency Application exploring the world of digital assets. Additionally, I've integrated a live chat feature (tawk) to facilitate real-time communication between users and customer support, showcasing my dedication to enhancing user experience and support services. Built with ReactJs and CSS(Styled Components, this project is responsive and adapted to desktops and mobiles.

ReactMeals
An extensively interactive e-commerce restaurant built with CSS Modules and ReactJs that allows users place orders seamlessly and add items to their cart for a smooth checkout experience. It's focused mostly on functionality and user-experience. As my first ReactJS project, it showcases my familiarity with context providers for state management.

Advt.
Advt is an online gadget store built with pure Html,CSS and Javascript. This was my first full website and showcases my mobile responsiveness skills, eye for details and commitment to a pixel perfect design. Advt is a user-friendly website with a minimalist yet visually appealing design.

Deliciouss
Deliciouss is a food and recipe site built with ReactJs and CSS. This website was built with the Spoonacular API and demonstrates my routing and data fetching abilities. Leveraging the power of the Spoonacular API, this platform allows you to explore a vast world of delicious food, pastries, and recipes all in a seamless, beautiful, user-friendly and responsive interface.

Acme Rockets
Built with TailwindCSS and Html, this is a basic website that showcases my knowledge on mobile responsiveness, dark and light themes and TailwindCSS

TIC-TAC-TOE Game
This was a game I built very early on demonstrating my knowledge of pure javascript and interactive components.

Expenses App
This is a code-along project that helped ground my react skills on passing up/down props, rendering components and handling input forms. This practical application empowers users to manage their expenses effectively, highlighting my ability to build functional and user-friendly web applications.

Portfolio Website

My favorite project built with NextJs and showcasing my pure CSS skills represents the epitome of my creativity and familiarity with NextJs framework. Inspired by a Behance design and infused with my own artistic flair, this website showcases my eye for design and the power of NextJs. It demonstrates my diverse skills as a web developer/creative designer and passion for crafting great online experiences. Feel free to explore my projects from web development to UI/UX and Graphics and witness the passion and dedication I've poured into each one.

UI/UX and Graphic Designs:

I designed a couple of landing pages, fliers, image manipulations and full on websites with Figma, Photoshop and InDesign tools. Creativity makes me happy and bringing these designs to life enhanced my creative and design skills. A few were built with tutorials, most were built solely by me with inspiration from behance/dribble and a couple others were my design ideas from scratch.
