Technical Skills

- HTML	- CSS	- Javascript
- ReactJs	- NextJs	- TailwindCSS
-TypeScript	- Firebase	-Git Version Control
- Rest APIs	- NPM Packages	- Redux Management
- Figma	- Photoshop	-Indesign

Education and Certifications

Obafemi Awolowo University, Ile-ife - *B.Sc Psychology*
2014 - 2018

Chartered Institute of Personnel Management - *Associate Member (ACIPM)*
April 2022

Human Resources Management - *Obafemi Awolowo Consultancy Services Centre and Ultra Brains Institute of Information Technology.*
July 2018

Projects

MyStoryBoutique
This is my latest and an ongoing project, an e-commerce store built with Typescript, NextJs, Firebase, TailwindCSS. It will allow users browse through a variety of different kinds of apparels, make a wish list, add orders to cart and checkout.

MovieVerse
MovieVerse, my latest and an ongoing project, is a movie-themed website built with NextJS and Tailwind CSS. I demonstrate my ability to make API requests in a responsive user interface and server side vs client side rendering with this project. Utilizing the TMDB API, this project features a database of hundreds of movies.

Portfolio Website
My favorite project built with NextJs shows my creativity with vanilla CSS and familiarity with NextJs framework. Inspired by a Behance design and infused with my own artistic flair, it incorporates Context API, Framer Motion, Splide, Routing, CSS Modules and a backend Forms service: Formspark. It also contains my projects from web development to UI/UX and Graphics.

PeerStakes
This project demonstrates my routing and authentication skills through an interactive ReactJS-based Betting App with an integrated Stripe payment processor, a google sign in feature and manual authentication with Context API. My design inspiration was gotten from a figma project, and this project utilizes Styled Components and framer motion.

WalletNode
This is a responsive app built with ReactJs and CSS(Styled Components) that explores the world of digital assets. I've integrated a live chat software (tawk) to facilitate real-time communication between users and customer support.

FoodOnline
An interactive e-commerce restaurant built with CSS Modules and ReactJs that allows users place orders and add items to their cart. It's focused mostly on functionality and user-experience. As my first ReactJS project, it showcases my familiarity with context providers and state management.

Advt.
Advt is a dummy online gadget store built with pure Html, CSS and Javascript. This was my first full website and showcases my mobile responsiveness skills, eye for details and commitment to a pixel perfect design. Advt is a user-friendly website with a minimalist yet visually appealing design.

Deliciouss

Deliciouss is a code-along food and recipe site built with ReactJs and CSS. This website was built with the Spoonacular API and demonstrates my routing and data fetching abilities. Leveraging the power of the Spoonacular API, this platform allows you to explore a vast array of food, pastries, and recipes in a user-friendly and responsive interface.

Acme Rockets
Built with TailwindCSS and Html, this is a code along basic website that showcases my knowledge on mobile responsiveness, dark and light themes and TailwindCSS

TIC-TAC-TOE Game
This was a game I built very early on demonstrating my knowledge of pure javascript and interactive components.

Expenses App
This is a code-along project that helped ground my react skills on passing up/down props, rendering components and handling input forms. This practical application allows users manage their expenses effectively, highlighting my ability to build functional and user-friendly web applications.

UI/UX and Graphic Designs:
I designed several websites, landing pages, fliers and image manipulations with Figma, Photoshop and InDesign tools. Creativity makes me happy and bringing these designs to life enhanced my creative and design skills. A few were built with tutorials, most were built solely by me with inspiration from behance/dribble and a couple others were my design ideas from scratch.
